The State of Colorado Energy-Rebate Program

Governor's
Energy Office

GEO to Launch Energy Rebate Program April 19th.

On April 19, the Governor's Energy Office (GEO) will launch a new and comprehensive website and begin offering energy efficiency and renewable energy rebates to provide Coloradoans an unprecedented tool to save money and embrace Colorado's New Energy Economy. The GEO rebates will be available to Colorado residents and statewide and, in most cases, will be applied for separately and in addition to local utility or government incentives. .

The program is designed to stimulate the economy and save energy by encouraging Coloradoans to replace old appliances with new ENERGY STAR® models, incorporate energy efficient measures, or install renewable energy systems. The 75,000 rebates worth approximately **\$18 million** will be offered **on a first-come, first-serve basis** until funds are exhausted.

The new GEO site will offer comprehensive and localized information about rebates and financial incentives, service providers, conservation and money-saving tips, and energy news from across the state, as well as personalized tools and planners. *Source <http://www.colorado.gov/energy/>*

Examples of Energy Efficient Appliances Rebate Amount:

Gas Tankless Water Heaters	\$300
High Performance or Gas Condensing Water Heaters (Includes propane and natural gas)	\$200
Gas Condensing (Heating System)	\$500
Gas Boilers	\$400

To find out more about The Energy-Rebate Program and ENERGY STAR heating and cooling systems, call *Northern Colorado Air* experts at **(970) 223-8873** or **(303) 684-8875**. *Northern Colorado Air* has been providing service in the entire Front Range for 18 years.
