for At Home

The world has slowed down for most of us as we stay home to keep ourselves and our neighbors safe. Thankfully, Northern Colorado Air, Inc., is an essential business, still open and continuing to provide great service on the northern Front Range.

Respiratory health concerns aren't all about viruses, though. People with asthma, allergies, COPD, and other conditions take great care to ensure the air circulating in their home is purified. Consider this: Most people spend 90% of their time indoors. At this moment, it's even more. Air pollution is responsible for a wide array of ailments from headaches to mold growth. In fact, the Environmental Protection Agency rates air pollution among the top five urgent environmental risks to public health. So if you're suffering with poor air quality, there's no time to waste in protecting both your health and the integrity of your HVAC system. Northern Colorado Air doesn't guess at what's going on with the air in your home. Using the AIR ADVICE to monitor the system, they evaluate your home air quality in a detailed report and implement a plan to fix it.

Northern Colorado Air is keenly aware of how crucial this service is and proudly recommends, installs,

After an air quality report is generated, corrections are implemented.

and maintains the following air purification products.

REME HALO

The award winning REME HALO® whole home in-duct air purifier reduces common allergy triggers from pollen, mold spores, dander and dust. It's been extensively tested on both airborne and surface bacteria and viruses such as MRSA, E. coli, and Norwalk. HALO is capable of purifying every cubic inch of air that your central air conditioning system reaches. Cooking, pet, and musty odors disappear as HALO purifies the air. If you can imagine breathing the fresh outdoor air inside without opening a window, you understand how powerful the REME HALO air purifier is.

PureAir

The Lennox PureAir air purification system cleans home air better than any other single system. Period. PureAir removes 99.9% of mold spores, pollen, dust, and pet dander. It eliminates more than 90% of bioaerosols including airborne viruses. And it destroys volatile organic compounds (VOCs) and odors from cooking, pets, solvents, and cleaning products. This powerful unit removes ozone and requires no cleaning by the homeowner. PureAir has a Merv (Minimum Efficiency Reporting Value) rating of 16, which is incredibly efficient, exceeding hospital intensive care/operating room filtration standards.

"I can't say enough about the Northern Colorado Air team. They treat my family's service calls like they were responding to a member of their family. They are careful to assess how urgent the situation is. Over the years we've had the whole range of calls to them, from urgent—a water heater situation and a dying furnace in a snowstorm—to the normal spring and fall tune-up calls. They are the most honest and knowledgeable HVAC company that I've ever worked with. As a result, when we needed extra filtering for my family's allergy and asthma concerns, we knew who we could trust. We put in a Lennox PureAir based on Jeff's recommendation. I'm so glad we did. It's nice to have that reassurance of the PureAir running around the clock, especially in these times."

Healthy Climate Carbon Clean 16® Media Air Cleaner (Merv 16)

The Merv 16 provides whole-home filtration with no additional energy costs, and it's compatible with any HVAC system. The Merv 16 removes more than 95% of particles down to .3 micron and more than 90% of bioaerosols down to .01 micron. It reduces and destroys ozone emissions. Incredibly, the Merv 16 can reduce ground-level ozone in your home by up to 50%. Fact: It would take six of the top-rated portable room air cleaners to equal the performance of one Merv 16. No cleaning is required, and there's a 5-year limited warranty on covered

While under quarantine, you'll be spending more time inside your home, making the air quality more important than ever. (Shutterstock)

components. The Merv 16 precision pleat media filter offers impeccable air quality in your home.

Northern Colorado Air understands concerns about safety during home visits, and takes great care now, as it always has, to ensure the protection of its staff and customers. Technicians will enter your home with courteous caution at appropriate social distance, wearing booties over

shoes and, upon request, gloves and masks. They'll listen to your concerns about Covid-19 and respond practically. Please note: So as to reduce trips and service calls, if you have other needs or scheduled maintenance, please share that with our dispatch/customer care representatives and they can map out an efficient response. Technicians might be there to install a PureAir system, but if your HVAC

condenser needs cleaning or water heater has an issue, it's best if they can address everything in a single visit. The company is prioritizing service calls at this time based on the seriousness of the situation the customer is experiencing. But please remember: Northern Colorado Air is available 24 hours a day in case of emergency.

They're your neighbors

Northern Colorado Air, Inc., has been here for decades. They're locally owned and family operated, and the goal of every person in the company is to offer peerless heating system repair, air conditioner repair, furnace installation, air conditioner installation, and HVAC service along the northern Front Range. Their HVAC technicians are experts who only install proven air conditioning systems, furnaces and heating systems, HVAC equipment and replacement parts.

You're reading this today because, despite the unsettling time we're living in with the threat of Covid-19, Northern Colorado Air does essential work and is willing to stake its reputation on its work, its safety measures, and its relationships with repeat customers and new clients alike. If you're ready to breathe clean, pure air again in your home, get in touch today.
